Bureau of Meteorology

# Outline

- **Introduction**
- **Australia COVID-19 situation**
- **Australian Government response to COVID-19**
- **Australian Bureau of Meteorology(BoM)/ Space Weather Services(SWS) response to COVID-19**
- **SWS activities during COVID-19**
- **Summary and Remarks**

Australian Government

Bureau of Meteorology

# Introduction

## **Coronavirus disease 2019 (COVID-19):**

- Broke out globally during February 2020
- Became a global pandemic in March 2020 (WHO,2020)
- Since March, lockdown has been enforced across the world
- First confirmed in Australia in January 2020
- Australia banned all international visitors since 19 March

Bureau of Meteorology

# Australian Government response to COVID-19

## Government Actions on COVID -19

### The Australian Health Protection Principal Committee(AHPPC):

- Chief Health Officers from each state and territory
- Chief Medical Officer
- Representatives from key departments.

## Key decisions and coordinated responses to the COVID-19 outbreak

### States and Territories:

Testing suspected cases  
Monitoring close contacts  
Travel restrictions  
Fever clinics

Australian Government

Bureau of Meteorology

# Australian Government response to COVID-19

## Controlling Coronavirus:

**Australia's COVID-19 response have saved lives:  
Australia's success in "controlling" COVID-19 stands out globally**

**Australia has performed better than many countries in controlling COVID-19**

**Lockdown measures   Extensive testing   Contact tracing   Border controls**

Australian Government

Bureau of Meteorology

# COVID- 19 BOM-SWS response

**Australian Government organisation that provides essential services integral to:**

- 1- The Australian community safety .**
- 2 - The viability of the Australian economy.**

**Actions: Consistent with the Australian Public Service (APS)**

**Guidance: Provided to all Australian Government Agencies**

- 1- Ongoing safety and wellbeing of all staff**
- 2- Ensuring continuity of essential services to the Australian community**

Australian Government  
Bureau of Meteorology

# COVID- 19 BOM-SWS response

## One Bureau approach:

### - National Incident Management Team (IMT)

- Engaging with agencies across the government
- Monitoring the coronavirus situation
- Developing BOM response plans.
- keeping BOM staff informed about the evolving coronavirus situation and BOM's response

## Ensuring continuity of essential services to the Australian community

**BOM staff designated as 'Home-based' or 'Essential- Home-based'**

Australian Government

Bureau of Meteorology

# SWS Activities during COVID-19 Pandemic

**Home Based Work(HBW) adoption March 2020:** (relatively seamless)

- **Staff transitioned to laptop based workstations** (prior to the pandemic )

SharePoint, Office 365 and multi factor authentication

**In response to the pandemic:**

- Staff were able to continue working from home with the tools they routinely used in-office.
- Remote access to in-house servers, workstations and applications

**A safe workstation at home**

- The workstation self-assessment/ checklist
- E-learning /training updated and simplified
- ICT support
- COVID-19 updates ( Evolving situation and BOM's response)

# COVID- 19 BOM-SWS response

Australian Government

Bureau of Meteorology

## A connected workplace:

### **-Microsoft Teams and slack communication platforms.**

Offering screen sharing, files sharing and videoconferencing

### **-CMR system for videoconferencing**

### **Daily check-in : Staff and their supervisors/managers**

Health and work tasks.

### **- Confidential counselling and support services**

- Employee Assistance Program (EPA) (remote counselling services)

Australian Government

Bureau of Meteorology

## **SWS Activities during COVID-19 Pandemic**

### **SWS critical operations at the Australian Space Forecast centre (ASFC):**

#### **SWS forecasters and support staff were categorised as "Home based –Essential"**

- Could attend the office during lockdown, but only when required
- Forecasting from home (on weekends) was already a routine activity (prior the pandemic).
- Home based forecast (relatively straightforward)
- Remote access to in-house servers, workstations and applications that support SW forecasting.

#### **Services and reports output were uninterrupted:**

- Clear procedures and these are maintained
- Written Communication procedures
- Backup forecaster roster created
- Communications channel

Australian Government

Bureau of Meteorology

# SWS Activities during COVID-19 Pandemic

**SWS critical operations at the Australian Space Forecast centre (ASFC)**

**Space weather services for the International Civil Aviation Organization (ICAO):**

**Australia Canada France Japan (ACFJ) consortium is On Duty Centre (ODC)**

**-forecasters are required to attend the Sydney office**

**A safe place to work**

- Social Distancing
- Good hygiene practices
- Cleaning
- Masks for on duty forecaster

## SWS Activities during COVID-19 Pandemic

### Some issues: Challenges to HWB

- Transition to remote working is uneven
- Productivity effects are also uneven
- New and previously unused technology such as MS Teams
- Organise equipment for HBW and make documentation available on new platforms.
- Communication procedures needed to be written
- There were occasions when MS Teams failed.
- Home networks did cause some issues early on.
- **Concern continue for personal safety when on public transport (when ACFJ is ODC).**
- **Refit during the pandemic:**
- The move to level 16 and back to level 15 during the pandemic( Without major issues)
- Power outage on 15 August when ACFJ ODC (was relatively seamless)

Australian Government

Bureau of Meteorology

## Summary and Remarks

### **Australia has performed better than many countries in controlling COVID19:**

- Attributed to a combination of lockdown measures, extensive testing, contact tracing and border controls.
- These measures carry with them substantial social and economic harms (the scale of the loss of life avoided).
- Impact of border responses due to our geography (more difficult for other countries).
- The lockdown measure: The sooner you do it, the better in terms of how quickly you can then come out of it.

### **COVID 19 BOM-SWS actions:**

Entirely consistent with the rest of the APS and the guidance provided to all Australian Government Agencies.

### **One Bureau approach:**

Focused on keeping staff safe and healthy while at the same time continuing to provide essential services to the Australian community

- **To date** we have been fortunate that no Bureau staff member has been diagnosed with coronavirus.

Australian Government

Bureau of Meteorology

# Acknowledgment

**We have continued to demonstrate our ability to deliver critical services with impact and value under what are unusual and challenging circumstances.**

My sincere thanks to:

**Lianne Grant (ASFC acting Manager)**

Senior/ Space Weather Forecasters

**-Colin Yulie (Operations Manager )**

Operations Team.

**- Incident and Crisis Management Teams:**

CMT and IMT

**-Everyone from across the Bureau who have been involved.**

***Thank you all for your ongoing hard work, continued dedication, patience and flexibility during this challenging period.***
